DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities:

On at least page 3, lines 3-5, the language of "one of legs of a pedestrian has struck up by the vehicle...." does not read in proper English. This and other similar phrases may occur throughout the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, there is a determination of collision duration when an object (singular) hits the vehicle. Then there is a determination in a change in locations of collisions with objects (plural) in a lateral direction of the vehicle. And lastly, the pedestrian collision circuit decides if the object (singular) being hit is a pedestrian. This is unclear.

Art Unit: 3616

By using the term object in both singular and plural forms to mean a pedestrian and also body portions (legs) of the pedestrian, this is unclear. Examiner is interpreting the monitoring of the change in locations of collisions of the vehicle with objects to be a plurality of contact points (both legs being hit) in the lateral direction of the vehicle.

The term "object" is also present in claim 4. Examiner reminds Applicant to make consistent changes also with respect to Claim 4.

Claim 2, line 4 and claim 5, lines 8-9 are unclear. The phrase "that one of legs of a pedestrian has struck up by the vehicle" does not read in proper English. Examiner is interpreting that in addition to determining that the vehicle has hit a pedestrian by hitting both legs, it may also determine the collision with a pedestrian by hitting one leg and the pedestrian is projected from the vehicle without the second leg making contact with the vehicle. Examiner suggests phrasing Claim 2 and 5 so as to clearly state that this is a secondary function of the collision condition monitoring circuit.

Allowable Subject Matter

Claims 1-5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mattsson et al. (USPN 6,802,556), Stephan et al. (USPN 6,744,354), Hattori et al. (USPN 6,561,301).
